Gait Training with a Walker (NWB)

Walking with a Device

The following program has been designed to help you learn how to use your walking device. Remember:

- Paths should be clear of cords and throw rugs.
- Wear comfortable shoes that have rubber soles.
- Watch for pets that have not seen you use a device before.
- Look for wet spots on the floor that may be slippery.

Gait Training with a Walker

- With both hands on the arm grips, bring the walker forward.
- Swing forward into the walker with your good leg.
- Be sure that the _____________ leg is OFF the ground at all times!

Keep your affected leg off the ground at all times.
Getting Up and Down from a Chair with a Walker

Getting up:
- Slide forward in your chair and then slide your ___________ leg forward. With one arm on the chair and one arm on the walker, push up to a standing position. Once you are standing, reach for the walker and place both arms on the handgrips. **Be sure that the ___________ leg is OFF the ground at all times!**

![Getting Up Illustration](image1)

Sitting down:
- Get close enough to the chair that you can feel it against the back of your legs. Slide your ___________ leg slightly forward. Reach back with one arm for the armrest/edge of the chair and slowly sit down. **Be sure that the ___________ leg is OFF the ground at all times!**
