

Theraband™ Upper Body Exercises: Back, Shoulders, & Arms

The goal of these exercises is to regain or maintain function of your upper body. To help increase your strength, these exercises use a resistive rubber therapy band.

To obtain the best results, please perform each exercise as shown.

Your occupational therapist has designed these exercises to meet your specific needs. For best results, please perform each exercise as shown.

If your symptoms change or become worse when you are exercising, stop the activity. If the symptoms persist or are bothersome, call your doctor's office.

ELBOW - Flexion

With band looped around hand and wrist, use elbow movements only.

Using other arm as anchor, bend elbow, pulling up.
